SUBJECT: CALENDAR YEAR 2019 ANNUAL REPORT OF THE U.S. NUCLEAR
REGULATORY COMMISSION'S ENFORCEMENT PROGRAM

Enclosed is the 25th Annual Report of the U.S. Nuclear Regulatory Commission's (NRC's) Enforcement Program. The Office of Enforcement (OE) prepared this report in accordance with a Commission-approved recommendation from a 1995 Enforcement Program review.¹ The 2019 Annual Report contains information regarding enforcement activities that occurred during the 2019 calendar year (CY). The report highlights escalated enforcement casework, noteworthy program focus areas, and ongoing activities that have had an impact on the agency's Enforcement Program. It also includes various supporting statistical tables and figures. The appendices to this report summarize cases involving publicly available escalated enforcement actions.

This report serves as an important agency communication tool for both internal and external stakeholders in recognition that the enforcement program is an integral, valuable component of the agency's regulatory programs. This report will be placed in the NRC's Public Document Room, as well as in the Enforcement Documents Collection on the Electronic Reading Room Web page of the NRC's public Web site. Therefore, in accordance with the Commission's policy in effect during CY 2019, sensitive security-related information, Safeguards Information, or Classified Information has not been included in this report. A separate report is being provided containing summaries of the security-related enforcement actions and other information which is not publicly available.
