Schlumberger Well Surveying Corporation
P. O. Box 2175
Houston, Texas

Attention: Mr. C. K. Ruddick
Vice-President Operations

Gentlemen:

Enclosed is Special Nuclear Material License SNM-287, as amended.

For details regarding procurement prior to June 30, 1960, of the allocated 2400 grams of plutonium as Pu-Be neutron sources, you should communicate with the Dayton Area Office, U. S. Atomic Energy Commission, Box 66, Miamisburg, Ohio, Attention: Mr. W. B. Creamer.

Diversification of materials from Commission stocks to licensees is scheduled on a federal fiscal year basis and, accordingly, we have allocated the quantity of plutonium you indicate you wish to receive during the current fiscal year. It will be necessary, after you evaluate your requirements for the fiscal year beginning July 1, 1960, that you submit a new request for plutonium for the forthcoming fiscal year, indicating withdrawal schedule by quarters.

In reviewing your application, it was also noted that the radiation symbol used on the shielded container (Drawing # H-49183) does not meet the requirements of Section 20.203, 10 CFR 20; accordingly, the radiation symbol should be changed to comply with the regulations before the containers are used for the sources.

Distribution:

L.D. MacKay, FIN-OROC, w/encl.
W.B. Creamer, DAO, w/encl. & NM Draft (3)
D. George, NMM, w/encl. & NM Draft
