

NOV 30 1984

Lixi, Inc.  
ATTN: Robert J. Savini  
Executive Vice President  
1438 Brook Drive  
Downers Grove, IL 60515

Gentlemen:

Enclosed is Amendment No. 13 to your NRC License No. 12-18215-01, which authorizes you to utilize imaging devices at remote locations as requested in your November 16, 1984 letter. Please note the following:

1. We have not authorized you to store the device in the authorized users' motel rooms as requested in Item 7 of your letter. Instead, we have required you, in Condition 19, to store them in a locked portion of the users' vehicles and away from the passenger compartments. In order to obtain this authorization you will need to describe your procedures for ensuring that the devices are stored away from occupants in the room or adjacent rooms and access is restricted in such a manner that the devices will not be tampered with or removed by unauthorized individuals (e.g., motel staff).
2. We have forwarded your requests for new, manually controlled devices and devices containing americium-241 to our Procedures and Certification Branch for review. When their review is complete, we will notify you of any additional information needed or the issuance of amendments to your licenses Nos. 12-18215-01 and 12-18215-02MD.

Please review the enclosed document carefully and be sure that you understand all conditions. You must conduct your program involving radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Possess radioactive material only in the quantity and form indicated in your license.
3. Use radioactive material only for the purpose(s) indicated in your license.
4. Notify NRC in writing of any change in mailing address.

8503120476 841130  
REG3 LIC30  
12-18215-01 PDR

5. Request and obtain appropriate amendment if you plan to change ownership of your organization, change locations of radioactive material, or make any other changes in your facility or program which are contrary to your license conditions or representations made in your license application and any supplemental correspondence with NRC. Any amendment request should be accompanied by the appropriate fee specified in 10 CFR Part 170.
6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
7. Request termination of your license if you plan to permanently discontinue activities involving radioactive material prior to your expiration date.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions and representations in your license application will result in enforcement action against you in accordance with the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

If you have any questions or require clarification of any of the above stated information, contact us at (312) 790-5625.

Sincerely,

Original Signed  
Bruce S. Mallett, Ph.D., Chief  
Materials Licensing Section

Enclosure: Amendment No. 13
