July 14, 1980

U. S. Nuclear Regulatory Commission
Region IV
611 Ryan Plaza Drive, Suite 1000
Arlington, Texas 76012

Gentlemen:

This is to confirm my telephone conversation April 24, 1980 with Mr. Jerry Everett and to report the permanent abandonment of two sealed sources in the well described below:

Transco Exploration Company
OCS-G-3462
Federal waters - offshore Texas
API No. 427-1340011
Total Depth 8550 feet

The 1.5 curie Cesium sealed source and the 16 curie AmBe sealed source are located below 6630 feet, as confirmed by gamma ray log. A cement plug (dyed red) was set from 6630 feet and 6430 feet. A whipstock shoe was set at 6425 feet. The hole was side tracked at 6312 feet and the hole drilled deeper.

An appropriate plaque will be provided to Transco for attachment to the well-head.

Sincerely,

C. E. Racster
Radiation Safety Officer
