Arlington, TX 76012

APR - 1 1985

Gentlemen:

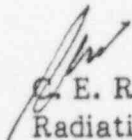

This is to confirm my telephone conversation of February 19, 1985 with Mr. Chuck Cain and to report the permanent abandonment of a 16 curie AmBe sealed source (NSR-F-A2686) and a 1.5 curie Cesium 137 sealed source (GSR-J-6908) in the well described below:

The well was drilled from drillship SEDCO BP 471. The well is called Ocean Drilling Program's Well Number 627B. It is located in international waters - longitude N 27° 37 feet 32 inches and latitude W 78° 16 feet 69 inches. Ocean depth is 1033 meters and well depth was 1571 meters.

The sealed sources are located at or below 1571 meters.

A cement plug was placed from 1553 to 1533 meters. A plaque was not placed since the well is totally abandoned and has no wellhead, no conductor pipe, and no casing; thus, there is no way to reenter the hole.

Sincerely,

  
C. E. Racster  
Radiation Safety Officer  
D/189
