Mr. George McCann
Medical Licensing
U.S. Nuclear Regulatory Commission
708 Roosevelt Road
Glen Ellyn, IL

030-01441

Dear Mr. McCann;

Please amend our license number NRC 12-03178-01 to accomodate a facility change. Due to a severe environmental control problem, we are unable to continue imaging in the designated area. We plan to move our two cameras to unused patient care areas which are large and secure.

The designated nuclear medicine facility will be used as before, except for imaging veing done elsewhere and the use of 133 xenon will be discontinued.

Doses will be carried from the radiopharmacy to the imaging area in shielded, absorbant and labelled containers. Injection area surveys will continue to be done and recorded. If we vacate an area, a close out survey will be performed and recorded.

The designated nuclear medicine facility will be kept locked when a technologist is not in attendance.

Thank you.

Sincerely,

Anthony G. Mastrangelo
