Paul:

Untill the IIRC acknowledges the damage its done to the W/B's, to the increase

risk this policy had on the public, I believe the NRC won't change. I believe
the NRC is more evil than the company.

Does this prohibit an employee from going to the media with a safety concern

if he believes both the company and Nrc are corrupt. They didnt even talk

about a safety valve, or path, if the Regulator is perceived as corrupt.

They

are worried about the public not trusting the NRC- the employees trust them

less.

GOOD JOB
