Gentlemen:

Subject: Combined Inspection Nos. 50-443/84-17; 50-444/84-07

This refers to the routine safety inspection conducted by Messrs. A. Cerne and H. Wescott of this office on October 29 - December 17, 1984 at the Seabrook Station Units 1 and 2, Seabrook, New Hampshire of activities authorized by NRC License Nos. CPPR-135 and CPPR-136 and to the discussions of our findings held by Messrs. A. Cerne and H. Wescott with Mr. J. Singleton and others of your staff at the conclusion of the inspection.

Areas examined during this inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

Within the scope of this inspection, no violations were observed. However, one activity appears to be a deviation from FSAR commitments as set forth in Appendix A. You are requested to respond to this letter and in preparing your response, you should follow the instructions in Appendix A.

The responses directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

Your cooperation with us in this matter is appreciated.

Sincerely,
