Director of Nuclear Reactor Regulation
Attn: Mr. James R. Miller
Operating Reactors Branch #3
Mr. John A. Zwolinski, Chief
Operating Reactors Branch #5
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Millstone Nuclear Power Station, Unit Nos. 1 and 2
Proposed Organizational Change to Technical Specifications
Training Supervisor

Pursuant to 10CFR50.90, Northeast Nuclear Energy Company (NNECO) hereby proposes to amend its operating licenses, Nos. DPR-21 and DPR-65, by incorporating the attached proposed change into each unit's respective Technical Specifications.

The proposed revision to Section 6 of each unit's Technical Specifications is provided as Attachment 1 and revises page 6-3 to remove the Training Supervisor from reporting to the Station Services Superintendent. The Training Supervisor now reports to the corporate Director of Nuclear Training. This change follows the implementation of a corporate Nuclear Training Department and is part of a consolidation of nuclear training responsibility under the corporate Director of Nuclear Training. This organizational change appropriately reflects the importance that a consolidated training group has in assuring the continued safe operation of our nuclear facilities.

NNECO has reviewed the attached proposed change pursuant to 10CFR50.59 and has determined that it does not constitute an unreviewed safety question. Specifically, the margins of safety as defined in each Technical Specification bases are maintained. In addition, the probability of occurrence or the consequences of a previously analyzed accident have not been increased and the possibility for a new type of accident not previously evaluated has not been created.

NNECO has reviewed the proposed changes, in accordance with 10CFR50.92, and has concluded that they do not involve a significant hazards consideration. The basis for this conclusion is that the criteria of 10CFR50.92(c) are not compromised, a conclusion which is supported by our determinations made

pursuant to 10CFR50.59. The Commission has provided guidance concerning the application of the standards in 10CFR50.92 by providing certain examples (48 FR 14870, April 6, 1983). One of the examples of actions likely to involve no significant hazards considerations is example (i), purely administrative changes to the Technical Specifications, for example, a change to achieve consistency throughout the Technical Specifications, correction of an error or a change in nomenclature. The proposed change is purely an organizational change which ensures that the Training Supervisor has the appropriate resources to perform his function. Thus, this change is administrative in nature and does not involve a significant hazards consideration.

The Millstone Site Nuclear Review Board has reviewed and approved the proposed revision and concurs with the above determinations.

In accordance with 10CFR50.91(b), NNECO is providing the state of Connecticut a copy of this proposed amendment.

Pursuant to the requirements of 10CFR170.12(c), enclosed with this amendment request is the application fee of \$150.00.

Very truly yours,

NORTHEAST NUCLEAR ENERGY COMPANY

W. G. Council
Senior Vice President

cc: Mr. Kevin McCarthy
