Good morning, Mr. Szczesniak and Mr. Grant:

This message concerns our review of your request dated January 23, 2020, to increase the iodine-123 possession limit for the above referenced license. Subsequent to that request, we received your February 7, 2020 letter indicating that you expected to complete the previously approved Transfer of Control on April 1, 2020. For the referenced iodine-123 possession limit increase, our office is trying to determine the appropriate licensee name to list on the amendment.

Accordingly, could you please indicate whether that Transfer of Control (TOC) been completed as indicated in the February 7, 2020 letter?

- If the TOC has been completed, please provide a signed and dated letter that the transfer of control – as related to the above-referenced license number as well as to NRC License Nos. 21-26707-01MD and 21-24828-01MD – has been completed as indicated in your letter. Your letter should clearly indicate the new licensee name to be listed on the license. Documentation confirming the completed transfer should be attached to your letter.
- If the TOC has not been completed, please provide a signed and dated letter indicating the new date by which you expect the TOC to be completed. If the transaction has not yet been completed and is not expected to be completed within 14 days of this message, please confirm that you wish to withdraw your February 7, 2020 request to update the license in accordance with the Transfer of Control.

*NOTE: Once the TOC is completed, you may resubmit your TOC-related amendment request without prejudice to NRC's review of that request.*

If not previously provided, please provide your written response to this message as a pdf file attachment to an email, including both my colleague Bryan Parker ([bryan.parker@nrc.gov](mailto:bryan.parker@nrc.gov)) and myself ([sara.forster@nrc.gov](mailto:sara.forster@nrc.gov)). Please provide your written response within 14 days of this message. If you could please also follow up with a call or e-mail response, confirming receipt of this message, clarifying the status of the TOC transaction, and indicating how you plan to respond, it is appreciated.

Thank you in advance for your attention to this matter.

Sincerely yours,

**Sara A. Forster, Health Physicist Licensing Reviewer**
