Docket No. 50-331

Iowa Electric Light and Power
Company

ATTN: Mr. Lee Liu
President and Chief
Executive Officer

IE Towers
P. O. Box 351
Cedar Rapids, IA 52406

Gentlemen:

As an effort to reduce the circuit blockage caused on the Health Physics Network (HPN) system by the privacy feature the NRC has ordered that this feature be removed. AT&T has scheduled Region III HPN modifications for the week of January 21, 1985. In order to make these modifications, the telephone company personnel will need access to all HPN extensions at the nuclear power plants within Region III for the modification and testing.

Additionally, all trouble reports for either the HPN or the Emergency Notification System (ENS) are now to be made to the NRC Operations Center, via either ENS or the following commercial telephone numbers (202) 951-0550 (direct) or (800) 942-5642 (through the NRC telephone operator).

If you have any questions or require additional information, please contact Ms. Linda Kers of my staff at (312) 790-5711.

Sincerely,

J. A. Hind
