Gentlemen:

This refers to the inspection conducted by Dr. J. B. Nicholas of this office on March 11, 1985, of activities authorized by NRC Operating License NPF-26 for Waterford 3, and to the discussion of our findings with Mr. L. F. Storz and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included a review of your actions taken to resolve previously identified inspection findings concerning the postaccident sampling system and selected NUREG-0737 requirements. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector. These findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By
E. H. Johnson

E. H. Johnson, Chief
Reactor Project Branch 1
