Docket No. 50-322

Long Island Lighting Company  
ATTN: Mr. John D. Leonard, Jr.  
Vice President - Nuclear  
P.O. Box 618  
Shoreham Nuclear Power Station  
Wading River, New York 11792

Gentlemen:

Subject: Inspection Report No. 50-322/84-48

This refers to the routine inspection conducted by Mr. N. Blumberg of this office on December 10-21, 1984, at Shoreham Nuclear Power Station, of activities authorized by NRC License No. NPF-19 and to the discussions of our findings held by Mr. N. Blumberg with Mr. W. Steiger and other members of your staff at the conclusion of the inspection.

Areas examined during this inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

Based on the results of this inspection, it appears that one of your activities was not conducted in full compliance with NRC requirements, as set forth in the Notice of Violation, enclosed herewith as Appendix A. This violation has been categorized by severity level in accordance with the revised NRC Enforcement Policy (10 CFR 2, Appendix C) published in the Federal Register Notice (49 FR 8583) dated March 8, 1984. You are required to respond to this letter and in preparing your response, you should follow the instructions in Appendix A.

While there are several factors which lessen the significance of this specific violation as stated in the attached inspection report details, we are concerned that the number and nature of the problems associated with the violation could be indicative of a serious weakness in implementation of your training and qualification plan for security force. Therefore, in addition to the response instructions of Appendix A, your response to the violation shall address this concern and provide your evaluation of the root cause(s) for the problems identified.
