Mr. John F. Stolz, Chief
Operating Reactors Branch No. 4
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Stolz:

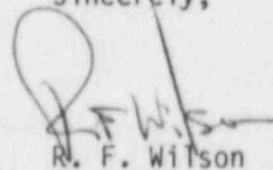

Three Mile Island Nuclear Station Unit 1 (TMI-1)
Operating License No. DPR-50
Docket No. 50-289
Steam Generator Eddy Current
Test Result Evaluation

In accordance with the Technical Specifications for TMI-1, an eddy current examination of the steam generator tubes was conducted in November and December 1984. An initial report on the results of the examination was contained in LER-84-007, submitted on December 17, 1984.

We have just completed a Technical Data Report (TDR No. 638) entitled "Evaluation of Eddy Current Indications Detected During the 1984 Tech. Spec. Inspection." This TDR supplements the information contained in LER-84-007.

We are continuing our evaluation of the results of the examination and we will provide you any additional information that becomes available.

Sincerely,

R. F. Wilson
Director
