MELATED CORRESPONDENC TRIAL LAWYERS FOR PUBLIC JUSTICE, P.C. COUNSELLORS AT LAW SUITE 611 2000 P STREET, NORTHWEST (202) 463-8600 WASHINGTON, D.C. 20036 ANTHONY Z. ROISMAN EXECUTIVE DIRECTOR 11:52 ARTHUR BRYANT STAFF ATTORNEY KEVIN HANNON SCIENCE ADMSOR SANDRA SHEPARD March 29, 1985 OFFICE MANAGER Stuart E. Treby, Esquire Office of Executive Legal Director U.S. Nuclear Regulatory Commission 4350 East-West Highway, 4th Floor Bethesda, Maryland 20814 In the Matter of Texas Utilities Generating Company, et al. (Comanche Peak Steam Electric Station, Units 1 and 2), Docket Nos. 50-445-2 and 50-446-2 Dear Mr. Treby: During the November interviews of the EG&G personnel a representation was made that they were going to continue to review information provided to them by the Staff in order to determine a need to modify or alter their opinion if necessary. We assume that the panel has been provided with such things as the TRT Reports, the SSERs, the transcripts of relevant Department of Labor hearings and depositions, and the ASLB hearing record itself. Since this is a relatively quiet time in this case, I believe it would be appropriate to schedule another interview with the EG&G panel as soon as possible. Please inform me of when we can expect to see their next report, and how soon they will be available to discuss their reactions to the additional information they have reviewed. It is our understanding that the Staff harassment and intimidation panel will complete their work in a few weeks. are somewhat surprised that no meeting was ever scheduled between the witnesses or former workers and the NRC panel, particularly since this practice has been followed by the Contention 5 panel. We would like to know how, in reaching their conclusion, the harassment and intimidation panel is going to incorporate the numerous other statements and complaints of craft personnel or other QA/QC personnel who did not testify in the hearing, but whose experience contributes to an understanding of how the plant's general atmosphere affected the safety of the plant. We are particularly concerned that information provided to the TRT by craft employees about the numerous methods used to "trick" QA/QC personnel be considered by both EG&G and the harassment and intimidation pane' B50 4050191 B50329 PDR ADOCK 05000445 DS03

Finally, as you know, it has been the Intervenor's continuing desire to expedite the hearing process on these issues. Since the depositions of the principal individuals responsible for the TRT findings and the SSERs will eventually have to be taken we propose that the following individuals be made available by the agency at your earliest convenience for deposition:

- Darrel Eisenhut 1.
- 2. Vince Noonan
- 3. C. Hale
- 4. David Terrero
- 5. R.J. Masterson
- 6. Herbert Livermore
- 7. Larry Shaw
- J. Zudans
 Larry Chen
- 10. Jim Gagliardo

Sincerely,

Anthony 2. Roisman sla Executive Director
