Dr. Wuv-Shyong Chang, Founder  
W. S. Chang and Associates, Inc.  
P.O. Box 8781  
Denver, Colorado 80201

Dear Dr. Chang:

Thank you for your letter of December 14, 1984, addressed to the Commissioners, expressing your views on the Three Mile Island accident and other issues. Your letter has been referred to me for response. The NRC relies heavily on external scientific and technical resources to carry out its mission to protect the public health and safety relative to commercial nuclear power plant operations. In support of this goal, experts from national laboratories, academic institutions, industry organizations and private firms are contracted by the NRC to perform work in many areas, including nuclear research, safety analysis and standards development. Additionally, the NRC staff has extensive interaction with the public, industry groups, private consultants and scientific societies in the course of normal activities. Through notices in the Federal Register, the NRC solicits external comments and recommendations in its rulemaking efforts. In summary, the NRC recognizes and encourages outside participation in all phases of its regulatory program.

Thank you for your comments and your interest in our activities.

Sincerely,

Original Signed by  
H. R. Denton
