In the Matter of
LOUISIANA POWER & LIGHT COMPANY
(Waterford Steam Electric Station, Unit 3)
Docket No. 50-382

Dear Mr. Leddick:

By letter dated November 27, 1984, your Mr. K. W. Cook requested that our office issue a second Certification of Pollution Control Facilities for the Waterford Steam Electric Station, Unit 3 for certain facilities which are described in Exhibit A to the request. A similar certification was issued to you on June 12, 1984.

The staff has reviewed the request. Based on the review, we are satisfied that that the portions of Waterford Steam Electric Station, Unit 3 for which NRC certification was requested are "pollution control facilities." Accordingly, the attached certificate has been executed.

Copies of the request and this response will be available for inspection at the Local Public Document Room (University of New Orleans Library, Louisiana Collection, Lakefront, New Orleans Louisiana) and at the Commission's Public Document Room at 1717 H Street, N. W., Washington, D. C.

Sincerely,

Original Signed by

CERTIFICATE

UNIT 3 (NUCLEAR) WATERFORD STEAM ELECTRIC GENERATING STATION

POLLUTION CONTROL FACILITIES

The Nuclear Regulatory Commission (the NRC) hereby certifies as follows:

(a) that it has examined Exhibit A attached hereto which is entitled "General Description of the Facilities" and which describes certain facilities which have been constructed, are under construction or are to be constructed at the Unit 3 (Nuclear) Waterford Steam Electric Generating Station, a nuclear electric power generating plant located in St. Charles Parish at Taft, Louisiana, which plant is owned by Louisiana Power & Light Company; and

(b) that such facilities, as designed, are in furtherance of the purpose of abating or controlling atmosphere pollutants or contaminants or water pollutants resulting from the generation of electricity at the Unit 3 (Nuclear) Waterford Steam Electric Generating Station.
