Re: Control #17646

Dear Sir:

Regarding our phone conversation of December 19, 1984 and my letter dated December 7, 1984 wherein I state in point #4 that a label will be affixed to the device stating not for human use, introduction into foods, beverages, cosmetics, drugs, or medicine or into products manufactured for commercial distribution is prohibited - except quantities should not be combined, we would like to correct this point and state that this information will not be on a label affixed to the devices but be information supplied in our brochure.

Please incorporate this correction.

Regards,

James A. Welsh
