Docket Nos. 50-266
and 50-301

Mr. C. W. Fay, Vice President
Nuclear Power Department
Wisconsin Electric Power Company
231 West Michigan Street Room 308
Milwaukee, Wisconsin 53201

Dear Mr. Fay:

On December 17, 1982, Generic Letter 82-33, "Supplement No. 1 to NUREG-0737-Requirements for Emergency Response Capability" was issued to all licensees of operating reactors, applicants for operating licenses and holders of construction permits. By letter dated September 1, 1983, you responded to Generic Letter 82-33 with regards to conformance to Regulatory Guide 1.97 Revision 2 criteria for the Point Beach Nuclear Plant Units 1 and 2. We have completed our initial review of your submittal and are transmitting the enclosed Interim Report prepared by our contractor. We request that you review the Interim Report and, within 60 days of your receipt of this letter, respond to the open items. You should also respond if the enclosed report includes any incorrect assumptions or reflects a commitment you believe to be beyond the intent of your previous response.

The reporting and/or recordkeeping requirements contained in this letter affect fewer than ten respondents; therefore, OMB clearance is not required under P. L. 96-511.

If you have any questions, contact your NRC project manager, T. G. Colburn, at 301-492-4709.

Sincerely,

Original signed by:

James R. Miller, Chief
Operating Reactors Branch #3
Division of Licensing
