MONTH November, 1984

The reactor power level was maintained at 100% for the report period, with two exceptions:

On 11/08/84 the reactor power level was reduced to ~ 95% for a short period of time due to a loss of flow indication of the "B" Main Feedwater Pump. The power level was returned to 100% after indication was restored.

On 11/11/84 the reactor power level was reduced to ~ 46% for a period of seven hours to perform a series of turbine valve and trip tests. The power level was restored to 100% after the tests.
