Mr. Carlton Kammerer
Director
Office of Congressional Affairs
Nuclear Regulatory Commission
1717 H Street, N.W.
Washington, D.C. 20555

Dear Mr. Kammerer:

Enclosed is a copy of a letter from my constituent, Mr. Walter Schoenrock, expressing his support of the reopening of the Nuclear Power Plan No. 1 at Three Mile Island.

I would appreciate the Commission giving every consideration to the concerns expressed by Mr. Schoenrock that those who are protesting the reopening in front of the TV cameras may not actually be representative of the feelings of those in the community.

Thank you for your attention and assistance in this matter.

Sincerely,

William S. Broomfield
Member of Congress

Hon. Wm. S. Broomfield,
House of Representatives,
House Office Building,
Washington, D.C. 20510

Dear Representative Broomfield:

Consideration will soon be given to the restart of Three Mile Island Nuclear Plant #1. This is the plant that was closed down at the time of the accident at Three Mile #2. We have not had any dividends from General Public Utilities since the accident. Since we are retired, the loss of the dividends to us and many people like us might be alleviated if Plant #1 was allowed to re-open.

You may have seen the recent T.V. story where "approximately 100" protestors voiced their objections to the reopening. There must be thousands of people living near by who apparently did not object to the restart of #1, because they were not present.

I hope that you and your colleagues will take some action to offset the small number of people who are seeking to keep this country out of nuclear power production, which we know we will have to have.

Yours truly,

Walter C. Schoenrock
