Attention: Mr. James P. O'Reilly, Administrator

Dear Sir:

Enclosed are copies of Revision 9 to the Joseph M. Farley Plant Security Plan. This revision changes the title sheet, table of contents, several of the numbered text pages, seven of the figures and one table.

The majority of the text changes are to correct the verb tense from future to the present. Copies of all numbered pages have been supplied so a complete exchange of the pages could be made. Also with this revision Alabama Power Company is assigning number 001 as the NRC controlled copy of the Security Plan. Future copies of revisions submitted to you will bear this controlled copy number.

These changes were made under the provisions of 10CFR50.54(p) and this submittal constitutes the required report.

Yours very truly,

R. P. McDonald
