Gentlemen:

Subject: Oyster Creek Nuclear Generating Station
Docket No. 50-219
Technical Specification Change Request (TSCR) No. 202

In accordance with 10 CFR 50.90, GPU Nuclear Corporation, operator of the Oyster Creek Nuclear Generating Station, Facility Operating License No. DPR-16, requests a change to Appendix A (Technical Specifications) of the license.

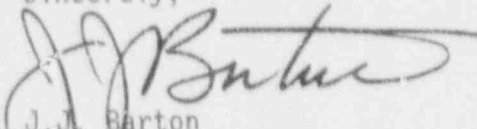

This TSCR proposes that the operability requirements for the main condenser low vacuum scram function in Table 3.1.1 of the Technical Specifications be revised to more accurately reflect the as-built design of the main condenser vacuum trip system.

This change request has been reviewed in accordance with section 6.5 of the Technical Specifications, and using the standards in 10 CFR 50.92, we have concluded that this proposed change does not constitute a significant hazards consideration.

Pursuant to 10 CFR 50.91(b)(1), a copy of this change request has been sent to the State of New Jersey Department of Environmental Protection.

If there are any questions, please call Mr. Michael Heller, Licensing Engineer, at (609) 971-4680.

Sincerely,

J.J. Barton
Vice President and Director
Oyster Creek
