AUG 24 1981

Docket No. 50-341

MEMORANDUM FOR: Brian Grimes, Director
 Division of Emergency Preparedness
 Office of Inspection & Enforcement

THRU: Frank G. Pagano, Chief
 Emergency Preparedness Licensing Branch
 Division of Emergency Preparedness

FROM: Paul P. Psomas, Team Leader
 Emergency Preparedness Licensing Branch
 Division of Emergency Preparedness

This is in reference to the August 3, 1981 memorandum from Robert L. Tedesco, (enclosure 1), Subject: Public Hearing for FERMI-2. Contentions 5 and 8 (enclosures 2 and 3) have already been assigned for action by Colleen Woodhead, ELD. These are the only contentions remaining in the emergency preparedness area. Contention No. 5 is being addressed by the Radiological Assessment Branch (RAB). RAB is addressing similar contentions for the Zimmer Nuclear Power Station.

For contention No. 8, ELD suggests that the following procedure be followed:

1. FEMA will address the means of public notification and the physical transport during evacuation of the Stony Pointe residents.
2. Mr. Tom Urbanik, Texas Transportation Institute is to address the evacuation time estimate methodology for Stony Pointe.
3. EPLB is to address the theory of Protective Actions. This testimony will be used to point out that evacuation is but one protective action option; another protective action that would be considered would be sheltering, for example.

Ms. Woodhead has requested that FEMA provide written testimony (enclosure 4) and a witness for the hearing. Mr. Urbanik has agreed to provide testimony for review by September 15, 1981, per telephone conversation August 5, 1981. He has also agreed to physically travel the evacuation routes prior to the hearing.
