Ms. Jona Souder
LPDR Branch
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Ms. Souder:

Recently one of my constituents, Stevi Stephens, acting in her capacity as Executive Director of the Nuclear Awareness Network, requested that the NRC relocate its Wolf Creek public document room from Emporia, Kansas to Topeka, Kansas. Ms. Stephens has advised me that Washburn University in Topeka, Kansas has agreed to make space available on its campus for this collection of public documents.

I strongly support the request of the Nuclear Awareness Network and believe that relocation of the public document room to Topeka would make it more accessible to a wide variety of individuals who are keenly interested in the Wolf Creek project. I include within this group of interested persons government officials, academics, members of the press, and various consultants employed by the Kansas Corporation Commission in its ongoing investigation of the Wolf Creek facility. I conclude that relocation of the document room would be in the public interest. I appreciate your consideration of this request.

Sincerely,

JIM SLATTERY
Member of Congress
2nd District of Kansas
