SUBJECT: SPENT FUEL SURVEY COMMITMENTS FOR MILLSTONE NUCLEAR POWER STATION,
 UNIT 3 (TAC NO. M72440)

Dear Mr. Feigenbaum:

On March 11-14, 1996, I visited the Millstone Nuclear Power Station, Unit 3 to conduct a survey on the spent fuel practices and spent fuel pool cooling system design and current licensing basis.

During the survey, your staff committed that at the earliest opportunity FSAR Table 9.1-2 will be revised to provide a detailed summary of the performance characteristics of the spent fuel cooling system for the four separate loading conditions, which form the normal operations and emergency core offload scenarios at the end of the spent fuel pool life.

Accordingly, I am requesting that you provide a letter within 30 days of receipt of this letter that confirms this commitment and indicates the projected completion date for the actions. This commitment will then be included in future inspection reports and will be tracked by the regional office until completion.

If you have any questions concerning these items, please contact me on 301-415-3045.

Sincerely,
 Original signed by:

Vernon L. Rooney, Senior Project Manager
