Re: 10CFR50.71(e)  
10CFR50.59

U.S. Nuclear Regulatory Commission  
Attention: Document Control Desk  
Washington, DC 20555

Millstone Nuclear Power Station, Unit No. 3  
Revision 9 to the Updated Final Safety Analysis Report  
and Addendum to Annual Report

Northeast Nuclear Energy Company (NNECO) hereby submits, as Attachment 2, Revision 9 to the updated FSAR in the form of replacement pages as required. Pursuant to 10CFR50.71(e)(2)(i), I certify that this revision accurately presents changes completed since our previous submittal that are necessary to reflect information and analyses submitted to the Commission or prepared pursuant to Commission requirements, as of December 31, 1995. NNECO is currently performing an extensive review of the Millstone Unit No. 3 design and licensing bases which may result in significant changes to the FSAR. In addition, as noted in the enclosed FSAR Update, Section 13.1, the Nuclear Group is currently engaged in a reorganization, and the organization described therein depicts that which existed in May 1996 and is subject to change. Changes from these efforts will be provided in a future submittal.

Pursuant to 10CFR50.71(e) and 10CFR50.4(b)(6), this transmittal consists of one original and ten copies. As stipulated in 10CFR50.71(e)(2)(ii): "This submittal shall include an identification of changes made under the provisions of Section 50.59 but not previously submitted to the Commission." Pursuant to Section 50.59(b) and Technical Specification Section 6.9.1.2, with the exception noted in the following paragraph, such information is routinely submitted to the NRC as part of our annual report, and is not included in this submittal. The most recent annual report was submitted on February 28, 1996,<sup>(1)</sup> for the period January 1, 1995, through December 31, 1995.

<sup>(1)</sup> F. R. Dacimo letter to the U.S. Nuclear Regulatory Commission, "Millstone Nuclear Power Station, Unit Nos. 1, 2, and 3, Annual Report," dated February 28, 1996.

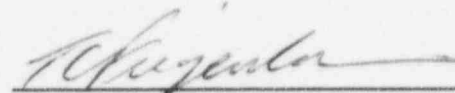

Through administrative oversight, four descriptions of changes entitled "Control Building Battery Rooms No. 3 and No. 4 Minimum Temperature Change," "Update of Local Site Flooding Analysis," and "Fuel Reconstitution," were omitted from the annual report submitted on February 28, 1996.<sup>(1)</sup> Those descriptions are provided herein as Attachment 1.

We trust that this information satisfies the requirements of 10CFR50.71(e).

If you have any questions, please contact Mr. J. S. Duddy at (203) 440-2082.

Very truly yours

NORTHEAST NUCLEAR ENERGY COMPANY
