Room: 11H4  
One White Flint North  
11555 Rockville Pike  
Rockville, MD 20852-2738

Dear Mr. Michaels:

As per your recent request, I am sending you photocopies of several of the Buffalo Materials Research Center's Annual Technical Reports. You indicated to me that you had received an inquiry from an individual from "Nuclear Information and Resource Service" regarding not being able to locate these reports in the Public Document Room and that you could not locate them in Docket 50.57. As we discussed, we are both certain that these reports were previously submitted to the N.R.C.

Marcel Boub from Nuclear Information and Resource Service contacted me directly to indicate that they could not find copies of some of the Annual Reports in a Public Document Room. I informed him that you and I had discussed this matter and that you had requested that I send copies directly to the N.R.C. There were some differences in the report years that Mr. Boub requested and those that you had indicated to me. I have enclosed copies of Annual Reports from 1975, 1977, 1979, 1980, 1981, 1982, 1984, 1985, 1986, 1988, and 1993 with this letter. I believe you also may have requested the reports from 1976, 1987, 1990, and 1995. I will forward copies of these reports shortly under separate cover.

As per our discussion, I am sending these directly to you and have not provided separate copies to the Document Control Desk. You had indicated that you would see to it that they were filed appropriately in the docket and the Public Document Room. I thank you for your assistance in this matter.

Very truly yours,

David R. Vasbinder  
Director
