

NUCLEAR METALS, INC.

December 19, 1991

U.S. Regulatory Commission
Region I
475 Allendale Road
King Of Prussia, Pennsylvania, 19046

Attention: Mr. John D. Kinneman, Chief
Nuclear Materials Safety Section

Dear John,

First I want to thank you on behalf of NMI for the time you and your colleagues spent with us during our meeting at Region I on Tuesday, December 17th. We are pleased to have been afforded the opportunity to present to you and your management a briefing on the status of our Holding Basin remediation project. As we indicated to you during this briefing, NMI remains totally committed to the successful completion of this project in a manner consistent with a sound business approach.

During our meeting you had indicated that the Region would like to participate in the Massachusetts Contingency Plan (MCP) process. Specifically, you wanted to review the MCP Phase II Comprehensive Site Assessment, Draft statement of work.

Enclosed is a modified version of this draft, which was submitted to the state Department of Environmental Protection in July of this year. It is this modified version carrying the July 1991 date which is currently under final review by the state.

Please feel free to contact us if you need any additional information pertaining to the above. Thank you.

Sincerely,

Frank J. Vumbaco
Frank J. Vumbaco, Manager
Health and Radiation Safety
