Subject: Oconee Nuclear Station  
Docket Nos. 50-269, -270, -287  
Proposed Revision to Technical Specifications  
Revision of LPSW-4 and LPSW-5 Surveillance  
Supplemental Information

In a letter dated June 6, 1996, Duke Power submitted a proposed amendment to the Oconee Nuclear Station Technical Specifications to support removal of the ES signal from valves LPSW-4 and LPSW-5. During the NRC review of the proposed amendment, a title header was discovered to have been inadvertently omitted in one of the pages of the new proposed Technical Specification. Please find the corrected page attached, along with instructions for replacement into the existing proposed amendment package.

Very Truly Yours,

A handwritten signature in cursive script, appearing to read 'J. W. Hampton'.

J. W. Hampton  
Site Vice President
