JOHN D. SIEBER
Vice President - Nuclear Group

November 2, 1992

U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555

Subject: Beaver Valley Power Station, Unit No. 1
Docket No. 50-334, License No. DPR-66
Proposed Operating License Change Request No. 202
(TAC No. M84673)

Enclosed are the following:

1. An application for amendment to the above license to allow the spent fuel pool storage capacity to be increased to 1627 storage locations, including two storage cans for defective fuel.
2. Documents designated Attachment A, B, C and D which set forth, respectively, the change in the technical specifications, the safety analysis (including the no significant hazards evaluation), the typed replacement technical specification pages, and a report entitled "Spent Fuel Pool Modification for Increased Storage Capacity, Beaver Valley Power Station Unit 1."

This change has been reviewed by the Onsite Safety Committee and Offsite Review Committee and was determined to be safe based on the attached safety analysis.

The requested target date for approval of this proposed change is November 1, 1993. If you have any questions regarding this submittal, please contact R. N. Ireland at (412) 393-5251.

Sincerely

J. D. Sieber
