MINUTES OF THE NUCLEAR SAFEGUARD COMMITTEE MEETING OF
May 9, 1991

OFFICE OF SECRETARY
MEMBERS PRESENT: E.F. Cobb, E. Kent Barefield, P.V. Desai,
Steve Ewald, Nick Gordon, B. Kahn (chair), Jim
Mahaffey, Henry Neumann, Jack Vickery.

OTHERS PRESENT: Betty Revsin, Billy Statham

DISTRIBUTIONS: (i) Agenda for the meeting
(ii) Minutes of the committee meeting of
March 21, 1991
(iii) Draft Procedures 3101, 6100, 0004, 3600
(iv) Copy of R. Karam's memo to B. Kahn on
irradiating silicon ingots

The chair called the meeting to order at 2.00 P.M.

1. The Committee approved the minutes subject to rewriting item (6) into two separate items as (6) and (7). The new Item (6) will remain same as the old item (6), with the removal of last sentence concerning cobalt source. The new item (7) will read as: It was learned that no decision had been made concerning a move to decommission Crenshaw's Mountain.
2. B. Revsin spoke in support of rescinding Procedure 5000 series by relegating it to the System Manual. The Committee decided to appoint a subcommittee to oversee such a changeover. The subcommittee will consist of E.F. Cobb, J. Mahaffey, and S. Ewald, and will report its recommendations to the full committee.
3. The Committee discussed a proposed modification of Procedure 3101. It was decided to not approve the modification, but the specific application of aluminum foil wrapping on silicon ingot was approved.
4. The Committee discussed a request to allow setting of lower limits on secondary water flow rate in the GTRR. It was decided that more data were needed to perform detailed power calculations and that the request be denied. However, a 90-day trial approval was given with the proviso that the flow rate be adjusted back to 960 gpm at the end of the trial period.
5. The Committee members were reminded of Item 8 of the agenda, concerning audit assignments.
