Washington, DC 20555

SERIAL: GDP 96-0167

Dear Mr. Hauber:

United States Enrichment Corporation (USEC) - Revision to Application for Export Licenses

USEC letter to you dated May 30, 1996, requested, in part, an export license for a contract with Nuclear Electric in the United Kingdom (UK). The license number associated for this application is XSNM 2938. Per discussions with your staff, USEC requests this license application be amended as indicated below to restrict the end use of USEC's supplied material to the Sizewell B-1 reactor. Other items remain as indicated in the export license application.

Item 11: Ultimate end use
Currently reads: Sizewell B-1, Bradwell-1, Bradwell-2

Revise to read: Sizewell B-1

It is urgent that we receive this license as soon as possible to fulfill our contractual obligation with Nuclear Electric. The shipment must leave our Portsmouth, Ohio, facility by August 27, 1998 to reach the UK facility by the deadline specified in our contract with Nuclear Electric. Should we fail to meet our deadline, a \$10 million revenue would be at risk.
