Dear Ms. Holt:

Re: Request for Amendment to NRC License No. 14-18885-01 (as amended)

This is a request by Muscatine Power and Water (The Board of Water and Light Trustees of the City of Muscatine, Iowa) to amend its NRC By-Product Material License No. 14-18885-01. This request is to add and (or) change the following items:

- Item A - We respectfully request that Section 9 of our specific license be amended to read: "For possession and use in Kay-Ray devices which have been evaluated and approved for licensing purposes and authorized for distribution under a license issued by the Nuclear Regulatory Commission or an Agreement State".
- Item B - We respectfully request that Section 5 of our specific license be amended to read: "Stewart Road, Muscatine, Iowa 52761". This change is required because the Maple Grove Road entrance is no longer used. Instead the Stewart Road entrance has become the main entrance. We wish to emphasize that this request is merely of a technical nature and that the facilities are still at the same physical location as indicated on the specific license application and subsequent amendments.

As in the past, you will find enclosed the original plus three (3) copies of this request for amendment to Muscatine Power and Water's U.S. Nuclear Regulatory Commission License. No amendment fees are enclosed as the City of Muscatine is exempt from payment of license fees. Section 170.11 (a)(9) of Part 170 provides that no fee will be required for, "A license for possession and use of by-product material, source material, or special nuclear material applied for by, or issued to, an agency of a state or any political subdivision thereof."

FEE EXEMPT
