Tumor Institute of the Swedish
Hospital
Department of Radiation Therapy
1211 Marion Street
Seattle 4, Washington

Attention: Dr. Orlan Wildermuth, Chairman
Licensing Committee

Gentlemen:

This refers to letter dated June 3, 1965, signed by Clifford
G. Lewis, Acting Physicist.

Your application to use tritiated thymidine in students at
the Rainier School for Retarded Children at Burley, Washington,
should be supplemented with a complete research protocol as
described in Appendix F of our licensing guide for medical
programs. We do not routinely authorize the use of byproduct
material in children for investigational studies, however, we
shall be happy to review your application to conduct such a
study. Applications for non-routine or investigational uses
of byproduct material are reviewed with the assistance of our
Advisory Committee on the Medical Use of Isotopes.

Very truly yours,

John E. Bowyer
Isotopes Branch
Division of Materials
Licensing
