Re: Amendment to License No. 12-24382-01

Gentlemen:

We have a nuclear materials license no. 12-24382-01, dated October 4, 1984 for the operation of nuclear soil density gages. We would like to amend Condition 12 to read as follows:

"Licensed material shall be used by, or under the supervision and in the physical presence of, individuals who have satisfactorily completed a device manufacturers training program for gauge users and have been designated by the licensee radiation protection officer. The licensee shall maintain records of the individuals who have been designated as authorized users."

We would like the wording of Condition 12 to be open so that persons trained by either Campbell Pacific Nuclear or the Troxler Company on radiation safety would be eligible to use the gage, since the gages of these two manufacturers are almost identical.

A check in the amount of \$60.00 is enclosed. Thank you very much.

Very truly yours,
APPLIED SOIL MECHANICS, Inc.
