Electric Corporation

Energy Systems  
Business Unit

Thomas E. Mistler  
General Manager, ESBU Operations

Box 355  
Pittsburgh Pennsylvania 15230-0355

May 2, 1996

Mr. William Russell  
Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Dear Mr. Russell:

Nat Woodson has resigned from his position as president of the Energy Systems business unit (ESBU). During his Westinghouse career, Nat has made major contributions to our commercial nuclear power business, and we will miss him.

To ensure a smooth transition, Fran Harvey, chief operating officer of the Industries and Technology Group, will assume responsibility for leading the Energy Systems business unit as acting president. I will serve as general manager for ESBU operations, with responsibility for all business unit divisions and staff functions except the Process Control division (PCD). Ann Pauley will continue as general manager of PCD. Both Ann and I will report to Fran Harvey.

In the context of these events, we will be taking a new look at how to best serve the needs of our customers and licensees around the world. Clearly, the best way we can help you as our customer is to continue to maintain our emphasis on quality performance and to further improve our competitiveness. We intend to intensify our focus on your needs, including broadening the range of value-added services we provide.

Let me assure you that our top priority during this transition will be to excel in meeting your expectations. We look forward to a continued strong working relationship with you as we move into the future.

Sincerely,

*Tom Mistler*
