

May 17, 1996

MEMORANDUM TO: James L. Blaha
Assistant for Operations
Office of the Executive Director for Operations

FROM: Frank J. Miraglia, Deputy Director
Office of Nuclear Reactor Regulation

SUBJECT: REPLACEMENT OF TRIP NUMBER 135 OF THE APPROVED NRR FOREIGN
TRAVEL PLAN - 3RD QUARTER FY 1996, MEMORANDUM OF MARCH 19,
1995 FROM BLAHA TO DIRECTORS

HM Nuclear Installations Inspectorate (NII) has requested that NRC study and observe the first Sizewell B refueling outage and provide NII with a portrait of Sizewell shutdown operations from the perspective of NRC experience in the US. This activity will also benefit the NRC's shutdown rulemaking and inspection activities. We have decided this request should be supported under the bilateral agreement between NII and NRC, and we plan to send Warren Lyon (SRXB/DSSA) to NII for the week beginning June 16, 1996, followed by his being at the Sizewell B site from June 24 through July 5, 1996 (inclusive). Warren will also participate in meetings with William Russell at NII on June 20 and 21.

Consistent with advice from Michael Cullingford, the Sizewell trip should replace the Subject Director's Office trip of Callan/Martin that was scheduled from June 15 through June 26, 1996 to visit NPPS Operational and Inspection Practices. Warren's travel forms are attached.
