## Prioritization of Topical Reports Submitted for Review by the Office of Nuclear Reactor Regulation

- References: (1) Letter, David B. Matthews (USNRC) to H. D. Curet (SPC), same subject, August 15, 1996.
- (2) Letter, R. A. Copeland (SPC) to R. C. Jones (USNRC), "SPC Topical Report Reviews," RAC:96:040, May 16, 1996.

As requested in Reference 1, I am forwarding the attached Table 1 which prioritizes the Topical Reports submitted for review by the Office of Nuclear Reactor Regulation. Also attached is Table 2 which prioritizes those topical reports that SPC intends to submit for review.

Please note the first report in Table 2 is a replacement for the letter from R. A. Copeland to R. C. Jones, "BWR Rod Burnup Limit" in Table 1 of the attached copy of Reference 2 previously submitted to the NRC. Since there was a misunderstanding about the need for NRR to review the letter, the replacement report is to be submitted.

Please consider the information contained in the attachments to this letter to be proprietary to Siemens Power Corporation. As required by 10 CFR 2.1790(b), an affidavit is attached to support the withholding of this information from public disclosure.

If you have any questions or if I can be of further assistance, please call me at (509) 375-8563.

Very truly yours,

  
H. D. Curet, Manager  
Product Licensing
