By letter dated December 20, 1989, the Baltimore Gas and Electric Company (BG&E) proposed a Technical Specification change relating to low temperature overpressure protection for Calvert Cliffs Unit 1. Additional information was provided by letters dated January 23, 1990 and February 2, 1990. BG&E identified a related TS change by letter dated February 14, 1990. The Reactor Systems Branch (SRXB) has reviewed the licensee's submittals and prepared the enclosed safety evaluation (Enclosure 1). We find the proposed Technical Specification changes acceptable.

Our SALP evaluation is provided in Enclosure 2. This completes the SRXB effort for TAC No. 75562.
