11 Sept. 1992

Dear Licensee Reviewer,

In response to NRCB 92-02, the following abbreviated report is submitted.

1. We do not have any of the listed teletherapy units from which AECL is withdrawing support.
2. We do have the following unit:
1 AECL Theratron 780 sn 136
Date of manufacture: Not sure, but probably 1975 - 1976 time frame.
Installation Date: December 1976
3. The unit is used clinically and on average we treat 20 - 25 patients per day, 5 days per week.
4. The machine is under service contract which includes two routine preventative maintenance inspections each year.
5. Based on the reporting criteria, I feel that we are exempt from any other reporting requirements.

Sincerely,

Warren Bryant, M.S

Physicist & RSO for CRTC
