Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 030-32294/92-01

This refers to the initial, unannounced inspection conducted by Mr. R. A. Brown of this office on September 17, 1992. The inspection included a review of activities authorized by Byproduct Material License No. 11-27350-01. At the conclusion of the inspection, the findings were discussed with members of your staff.

The inspection was an examination of activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, and observation of activities in progress.

During this initial inspection, the inspector discussed with your staff the requirements with which you must comply, including the NRC and Department of Transportation regulations, and the commitments in your license application. The NRC enforcement policy was also discussed at this time.

No violations or deviations were identified; therefore, no response to this letter is required.

As noted by the inspector, you currently possess and use one moisture/density gauge. Your Radiation Safety Officer appeared knowledgeable about NRC requirements and had an adequate recordkeeping system.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter will be placed in the NRC Public Document Room.
