

MAR 23 1964

DLR:KEL  
40-534

General Electric Company  
Nela Park  
Cleveland 12, Ohio

Attention: Mr. I. Matelsky, Chairman  
Radioisotope Committee

Gentlemen:

This refers to your application dated February 3, 1964, for amendment of your Source Material License SMB-1F1 to include an additional 500 pounds of thorium.

In order to continue our review of your application, we require the following additional information:

1. A diagram of the ventilation system for the proposed activity including the capture velocity at each point where airborne radioactivity may be generated and showing the locations of process equipment, dust collection devices, exhaust fans and air discharge stacks.
2. A further description of the vacuum cleaner used for decontamination purposes, including a description of the system for filtration of air exhausted from this unit.

Regarding your request for withholding your application from public inspection, we require that you specify the reasons why the application should be withheld and how the disclosure of the information would adversely affect the interests of the General Electric Company.

Very truly yours,

9210070219 920226
