General Comment

Please keep nuclear waste highly regulated. Please care for your fellow humans that could be affected by nuclear waste that is unsafe/causes health problems. Hoping that nothing will go wrong is not any kind of protection. Please consider the ecological impact and your moral obligation over politics or greed. Any money saved by entities will in all probability NOT go back to any Ohio residents but only enrich a few individuals. Money to be made should not be the basis on deciding such an important issue. NOR should the politics of today influence any health/safety issues as harmful to all life as nuclear waste is even at what is considered low levels. One cannot reverse the potential damage to our environment. I believe abuse of this policy would and probably will occur and you cannot put the genie back into the bottle. Morals/human and environmental safety should be considered top priority here and not monetary gain by anyone. Ohio should not become a dumping ground for this harmful nuclear waste. You cannot fine a company enough money to fix a problem should one or more occur. You also cannot guarantee there would be no abuse of these guidelines. Past practices by private and public entities predict future ones. Thank you.
