2.			
3.			

TRAINING: No special training is required for any documents issued with this Change Notice.

REMARKS: IMC 0613, "Power Reactor Construction Inspection Reports," has been revised to enhance the inspection process efficiency, eliminate disparities in handling ITAAC maintenance issues, delete instructions regarding compliance backfit items and provide clarity for performance deficiencies (PDs) that are associated with ITAAC. If PDs are of low safety significance, even PDs associated with ITAAC may be screened as "minor." Also reflects organizational changes in NRR and NRO reunification.
