Mr. Jerry Heises  
Box 125  
Pleasanton, Kansas 66075

Dear Mr. Heises:

This letter is to inform you of our inspection findings in regard to your complaint that 700 millirem in accumulated dose had been dropped.

We have inspected the area in which you had a concern. The result of this inspection has substantiated your complaint. This inspection was documented in NRC Inspection Report 50-298/85-14, a copy of which is attached for your information.

The 700 millirem that accumulated on your direct reading dosimeter in excess of the TLD reading has been restored to your exposure history. This addition did not cause you to exceed any NRC limit for radiation exposure.

We appreciate that you brought this matter to our attention. If you have any further questions, please feel free to contact me.

Sincerely,

Original Signed By  
E. H. Johnson

E. H. Johnson, Chief  
Reactor Project Branch 1
