Mr C D W Thornton, Director
Division of Nuclear Materials Safeguards
U S Atomic Energy Commission
Washington D C 20545

Dear Mr Thornton:

Instructions and notices from your office involving Source & Special Nuclear Material have been addressed in general just to Northern States Power Company, 414 Nicollet Mall, Minneapolis, Minnesota 55401. Accordingly, internal routing of these important items is often delayed and sometimes misguided. Responsibility for compliance with the reporting requirements for SNM is within the Power Production Department of this Company. Would you kindly direct all future correspondence of this nature to the Manager of Power Production. Four copies of each transmittal would be appreciated.

Northern States Power Company currently has two (2) AEC Licenses authorizing possession of SNM. These are DPR-11 (ZQE) for the Pathfinder Generating Plant and DPR-22 (YND) for the Monticello Nuclear Generating Plant. A third license will soon be requested for the Prairie Island Nuclear Generating Plant. It is for these plants that we ask that information from your office be specifically directed to the Manager of Power Production

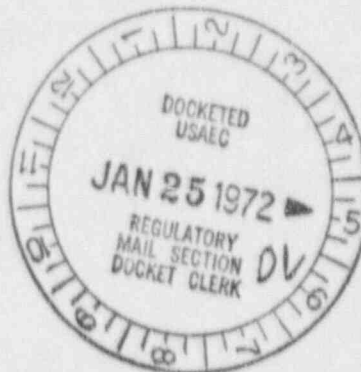

Thank you for your cooperation.

Yours very truly,

R O Duncanson, P.E.
Manager of Power Production
