Attention: Mr. W. F. Conway
Executive Vice President, Nuclear

SUBJECT: NRC INSPECTION REPORT NOS. 50-528/529/530/92-32

This refers to the routine inspection conducted by Messrs. G. Johnston, J. Russell, R. Pelton, D. Desaulniers, and M. McWilliams of this office on October 13, 1992 through October 23, 1992 of activities authorized by NRC License Nos. NPF-41, NPF-51, and NPF-74 and to the discussion of our findings held by the inspectors with Mr. R. Gouge and other members of the Arizona Public Service Company staff at the conclusion of the inspection.

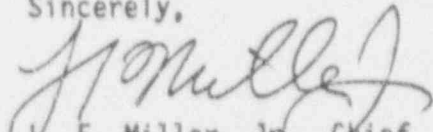

Areas examined during this inspection are described in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspectors.

The report concludes that the operator requalification training program has generally improved over the three year period since the last inspection of the training program. However, the report observed that Operations involvement with the preparation of training material could be improved.

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter and the enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be glad to discuss them with you.

Sincerely,

L. F. Miller, Jr., Chief
Reactor Safety Branch
