WASHINGTON, D.C. 20545

May 14, 1969

Docket No. 50-130

Northern States Power Company
414 Nicolett Mall
Minneapolis, Minnesota 55401

Attention: Mr. L. O. Mayer
General Superintendent of
Power Production

Gentlemen:

In accordance with your Application Amendment No. 47 dated November 25, 1968, as modified by Amendment No. 48 dated March 10, 1969, enclosed is Amendment No. 4 to Provisional Facility License No. DPR-11 which authorizes you to possess, but not to operate, the deactivated Pathfinder nuclear reactor. The amendment also authorizes you to possess and store certain special nuclear and byproduct materials in the reactor facility pending their removal from the Pathfinder Atomic Power Plant site. Byproduct Material License No. 22-08799-02 is also enclosed to cover those byproduct materials requested in your application dated March 10, 1969, filed with the Commission's Division of Materials Licensing, except that the request for possession and storage of 200 curies of antimony-124 has been incorporated in the amended Provisional Facility License No. DPR-11 inasmuch as this material is being stored in the reactor pool.

Please note that Provisional Facility License No. DPR-11, as amended, expires on March 12, 1970. If the application for authority to dismantle the facility (pursuant to Section 50.82 of Part 50) is filed at least 30 days prior to its expiration, the license will be continued in effect until such time as we have taken action on this application and the dismantling is completed. If such an application is not filed, it will be necessary for you to file an application for an extension of the expiration date of the license.

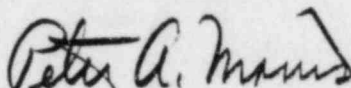

A copy of the Notice of Issuance of Amended Provisional Facility License, which is being filed with the Office of the Federal Register for publication, and a copy of our related Safety Evaluation are also enclosed.

Two copies of Amendment No. 11 to Indemnity Agreement No. B-27 are also enclosed for your signature and return of one copy to this office.

Sincerely,

Peter A. Morris, Director
Division of Reactor Licensing
