Branch

To the Secretariat:

This is to express my deep concern about the possible licensing of the Westinghouse Electric Corp. to export nuclear material for a proposed reactor in the Philippines.

I would like to request public hearings with full participation to aid the NRC to make careful examination of the health & environmental impacts and to use the same criteria it would use if the application were for a domestic license.

Thank you. Sister Mary Jane Hert

Dear Mr. Ahearne,

I am writing on behalf of the Friends of the Filipino People who have submitted a brief to the NRC asking that the NRC deny the request by the Westinghouse Electric Corporation to export nuclear material for a proposed reactor in the Philippines.

As a concerned American, I am asking the NRC to make careful examination of health and environmental impacts in the Philippines before granting the license and to use the same criteria that you would use if the application were for a domestic license.

Sincerely,

(Order of Servants of Mary)

Dear Commissioner Ahearne:

I am writing to urge you to deny the export license to the Westinghouse Electric Corporation. Placing the proposed reactor in the Philippines is unsafe and unjust. This action constitutes fiscal waste at the expense of the U.S. taxpayers and jeopardizes the lives of innocent people.

I urge all those responsible to exercise care in examining health and environmental impacts in the Philippines and to use the same criteria that would be used were this a domestic license.

Sincerely,

Barbara Cervenka
